UNIVERSITY

MACHINE POWERTRAIN

// Course#: CPT103

This course will feature web-based training prerequisites to be done on the CAT University website prior to class. The instructor-led training class will cover pressure checks, solenoid checks, calibrations, and diagnostic tests.

AFTER COMPLETION OF THIS COURSE, STUDENTS WILL:

- Understand the basic components used in Powertrains on CAT equipment.
- Demonstrate how to look up procedures to test Powertrain components.
- Understand the tooling needs to make solenoid checks and pressure checks.
- Understand how to perform calibrations on Powertrain components.

COURSE LENGTH:

- 3 Days

RECOMMENDED PREREQUISITES:

- CPT103 WBT Prerequisites complete
